

Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System (SECMS) is a Salesforce-based application developed to simplify and organize the academic activities of an educational institution. The system provides a centralized platform for maintaining student information, course details, enrollment records, instructor assignments, approvals, payments, and other academic activities.

1. INTRODUCTION

1.1 Project Overview :

The main purpose of this project is to reduce manual work and make the enrollment process faster and more organized. Enrollment officers can manage student registrations and course selections, while instructors and administrators can easily monitor student enrollment, course allocation, and academic information. The system also supports automated activities such as instructor allocation, task generation, data validation, and enrollment approval.

By using Salesforce Flows, Validation Rules, Approval Processes, Reports, and Dashboards, the system helps the institution manage enrollment activities in a structured manner. Administrators can monitor important information such as the number of enrolled students, course availability, payment details, student status, and pending approvals. This improves data accuracy, reduces processing time, and provides better visibility into the overall enrollment process.

1.2 Purpose :

The main purpose of SECMS is to provide a centralized and efficient Salesforce platform for managing student enrollment activities. It is designed to reduce paperwork and manual processes while improving the overall management of academic records.

The system aims to provide:

Centralized student and course
information
Simple and organized enrollment
procedures
Easy tracking of enrollment activities

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scattered	systems are manual and unintegrated	frustrated and error-prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision-ma king

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

- **Think & Feel:** Concerned about double bookings and revenue loss
- **Hear:** Complaints from students and management
- **See:** Multiple spreadsheets and emails
- **Say & Do:** Rechecks data, follows up manually
- **Pain:** Duplicate entries, approval bottlenecks
- **Gain:** Automation, dashboards, faster processing

2. IDEATION PHASE

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

2.3 Brainstorming & Idea Prioritization

Step 1 – Brainstormed Ideas

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

Step 2 – Grouping

- Manual solutions
- Semi-automated solutions
- Fully automated cloud solutions

Step 3 – Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact**.

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages covered:

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment

- Reporting & Completion

3.2 Solution Requirements

Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments

FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors.

Examples:

- Quick student registration form
- One-click enrollment approval
- Role-based dashboards

NFR-2: Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples:

- Only admins can modify course details
- Instructors view only assigned students
- Students cannot access other student records

NFR-3: Reliability

The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

- No duplicate course registration
- Accurate status updates after approvals
- Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

Examples:

- 24/7 cloud access
- Reliable during peak admission season
- Automatic backup of student records

3.3 Data Flow Diagram

- User inputs student and enrollment data
- System validates and stores records
- Approval process routes data
- Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning

Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem-Solution Fit

Problem-Solution Fit is the validation that the proposed solution effectively addresses the real problems faced by the target users before building the system.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

4.3 Solution Architecture

Solution Architecture is the high-level blueprint that defines the structure, components, and interactions of the system to fulfill the requirements.

For SECMS, it shows how Student, Course, and Enrollment objects, Flows, Approval Process, and Dashboards in Salesforce work together to automate enrollment.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile methodology
- Epics → Stories → Story Points
- Sprint-based execution
- Velocity calculation used for estimation

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create a Salesforce developer account so that I can configure and deploy the Student Enrollment system..	1	High	R. Manjilaa
Sprint-1	Data Modeling	USN-2	As an admin, I want to create custom objects for Student,	3	High	R.Sakthi Priya

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			Course, Enrollment, and Instructor so that academic data can be stored and managed efficiently.			
Sprint-2	Data Modeling	USN-3	As a user, I want dedicated tabs for each object so that I can easily navigate between students, courses, enrollments, and instructors.	3	High	A.Vennila
Sprint-2	Data Modeling	USN-4	As an admin, I want to create relevant fields such as student details, course information, and enrollment status so that complete records can be captured accurately.	5	High	R. Manjilaa
Sprint-2	Data Modeling	USN-5	As an enrollment officer, I want a centralized Lightning App so that I can access all academic operations from one interface.	3	High	R.Sakthi Priya
Sprint-2	Data Modeling	USN-6	As an admin, I want to define relationships between students, courses, and enrollments so that the system can logically link and track academic activities.	5	Medium	A.Vennila
Sprint-2	Data Modeling	USN-7	As a user, I want customized page layouts so that only relevant information is displayed, improving clarity and ease of data entry.	5	High	R.Manjilaa
Sprint-3	Automation	USN-8	As a system, I want to validate input data such as mandatory fields and enrollment limits so that incorrect or incomplete records are prevented.	3	High	R. Sakthi Priya
Sprint-3	Automation	USN-9	As a system, I want automated flows to handle enrollment processing and notifications so that manual effort is reduced and processes become faster.	3	High	A.Vennila
Sprint-3	Automation	USN-10	As an administrator, I want an approval process for enrollment requests so that registrations are verified before confirmation.	5	High	R. Manjilaa
Sprint-4	Security	USN-11	As an admin, I want to configure role-based security so that users can only access data relevant to their responsibilities.	5	High	R.Sakthi Priya
Sprint-5	Reports	USN-12	As a manager, I want reports on student enrollments, course registrations, and instructor assignments so that I can monitor academic operations.	4	High	A.Vennila
Sprint-6	Dashboards	USN-13	As a manager, I want visual dashboards showing enrollment	4	Medium	R.Manjilaa

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			statistics and trends so that I can quickly analyze system performance.			

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	15 Oct 2022	30 Oct 2022	20	30 Oct 2022
Sprint-2	20	6 Days	22 Oct 2022	08 Nov 2022		
Sprint-3	20	6 Days	02 Nov 2022	11 Nov 2022		
Sprint-4	20	6 Days	07 Nov 2022	20 Nov 2022		

6. Project Development Phase:

Project Flow:

Milestone 1: Salesforce Developer Account Creation

Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)

Milestone 3: Tabs Creation

Milestone 4: Lightning App Creation

Milestone 5: Fields Creation

Milestone 6: Create Relationships

Milestone 7: Page Layout Customization

Milestone 8: Validation Rules

Milestone 9: Flows (Automation)

Milestone 10: Approval Process

Milestone 11: Reports

Milestone 12: Dashboards

Milestone 13: Security Setup

Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone 1-Salesforce :

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

Go to <https://developer.salesforce.com/signup>

On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- Build AI agents with Agentforce, grounded in your data with Data 360
- Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- Build in the browser with the Agentforce Vibes IDE - no setup required
- Drag-and-drop when you want it, Apex when you need it
- 60+ MCP tools and 30+ coding skills, ready out of the box

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name: Manjilaa ✓

Last name: R ✓

Job title: Developer ✓

Company: Dhhyaa arts and Science ... ✓

Country/region: India ✓

Work email: manjilaamanjilaa@gmail... ✓

☒ I agree to the [Main Services Agreement](#), [Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) I am Developer Edition. Includes autonomous and other generative AI features, and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

First name & Last name

Email

Role : Developer

Company : College Name

County : India

Postal Code : pin code

Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **gmonisha482.987739e546e2@agentforce.com**. Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password

..... Good

* Confirm New Password

..... Match

* New Security Question

▼ In what city were you born?

* New Answer

salesforce Good

*=required

Change Password

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Student object:

Go to the Setup page.

Click on Object Manager.

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)
10. Under Search Status, select:
11. Allow Search
12. Click Save.

SETUP > OBJECT MANAGER
Student

Details

Custom Object Definition Edit

Save Save & New Cancel

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.
Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label Student Example: Account
Plural Label Students Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Student Example: Account

Description

Context-Sensitive Help Setting

- ☒ Open the standard Salesforce.com Help & Training window
- ☐ Open a window using a Visualforce page

Content Name

--None--

SETUP
New Custom Object

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name Student Name Example: Account Name

Data Type Text

Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status

[What is this?](#)

- ☐ In Development
- ☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☐ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

Save Save & New Cancel

In the same way Create **Courses, Instructors, and Enrolments objects**

Milestone 3 - Fields:

Table 1: Student Object Fields:

Field Label	Data Type
Student Name	Text (Standard)
Email	Email
Phone	Phone
Date of Birth	Date
Student Status	Picklist
Address	Text Area

Table 2: Course Object Fields:

Field Label	Data Type
Course Name	Text (Standard)
Category	Picklist
Duration	Number/Text
Course Fee	Currency
Description	Text Area

Table 3: Instructor Object Fields:

Field Label	Data Type
Instructor Name	Text (Standard)
Instructor Code	Text
Expertise	Picklist
Phone	Phone
Email	Email

Table 4: Enrollment Object Fields:

Field Label	Data Type
Student	Lookup (Student)
Course	Lookup (Course)
Instructor	Lookup (Instructor)
Enrollment Date	Date
Enrollment Status	Picklist

Fees Paid	Checkbox
Total Amount	Currency
Comments	Text Area

Milestone 4 – Create Relationships:

1. Activity 1: Create Lookup from Enrollment to Student:

1.

Go to Setup → click Object Manager.

2. Type Enrollment in Quick Find → click Enrollment__c object.

3. Click Fields & Relationships → click New.

4. Select Lookup Relationship → click Next.

5. For Related To, select Student__c → click Next.

6. Enter Field Label: Student (API Name: Student__c).
7. Click Next through Field-Level Security and Layout options (ensure it's visible and added to layout).
8. Click Save.

The screenshot shows the 'Step 1. Choose the field type' configuration page in Salesforce. The page title is 'Step 1. Choose the field type' and it includes 'Next' and 'Cancel' buttons. Below the title, it says 'Specify the type of information that the custom field will contain.' The 'Data Type' section lists four options: 'None Selected', 'Auto Number', 'Formula', and 'Lookup Relationship'. The 'Lookup Relationship' option is selected. Below the data type selection, there are fields for 'Field Label' (containing 'Student'), 'Field Name' (containing 'Student'), 'Description', and 'Help Text'. At the bottom, there is a 'Child Relationship Name' field (containing 'Enrollment') and a 'Required' checkbox. Below the 'Required' checkbox, there is a section titled 'What to do if the lookup record is deleted?' with three radio button options: 'Clear the value of this field. You can't choose this option if you make this field required.' (selected), 'Delete this record also. This allows users to delete large numbers of records without regard for sharing or visibility constraints.', and 'Don't allow deletion of the lookup record that's part of a lookup relationship.'

Activity 2: Create Lookup from Enrollment to Course

Purpose:

To link each Enrollment to a Course.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Select Lookup Relationship → Next.
4. Related To: select Course__c → click Next.
5. Field Label: Course (API Name: Course__c).
6. Click Next (set visibility and layout) → Save.

Step 1. Choose the field type Step 1

[Next](#) [Cancel](#)

Specify the type of information that the custom field will contain.

Data Type	
☐ None Selected	Select one of the data types below.
☐ Auto Number	A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
☐ Formula	A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
☐ Roll-Up Summary i	A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
☒ Lookup Relationship	Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Step 3. Enter the label and name for the lookup field Step 3 of 6

[Previous](#) [Next](#) [Cancel](#)

Field Label	Course i
Field Name	Course i
Description	
Help Text	i
Child Relationship Name	Enrollment_c i
Required	☒ Always require a value in this field in order to save a record

What to do if the lookup record is deleted: ☐ Place the value of this field. You can't change this value if you make this field required.

Activity 3: Create Lookup from Enrollment to Instructor:

Purpose:

To store which Instructor is assigned to a particular Enrollment.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Choose Lookup Relationship → Next.
4. Related To: select Instructor__c → Next.
5. Field Label: Instructor (API Name: Instructor__c).
6. Complete Field-Level Security and Page Layout options → Save

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

Purpose:

To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.

Click Validation Rules → New.

Rule Name: Student_Email_Domain_Validation.

Error Condition Formula: (example for @student.edu)

- NOT(CONTAINS(Email__c, "@student.edu"))

Error Message: Email must be a valid student institutional email.

Error Location: Field → Email__c.

Click Save.

The screenshot displays the Salesforce Setup interface. At the top, there are tabs for Setup, Home, and Object Manager. Below the tabs, the breadcrumb trail shows 'SETUP > OBJECT MANAGER' and the object name 'Student'. On the left sidebar, there is a list of configuration options: Search Layouts, List View Button Layout, Restriction Rules, Scoping Rules, Object Access, Field Access, Triggers, Flow Triggers, Validation Rules (which is highlighted), and Conditional Field Formatting. The main content area is titled 'Validation Rule Edit' and includes buttons for Save, Save & New, and Cancel. The 'Rule Name' field contains 'Student_Email_Domain_Validation'. The 'Active' checkbox is checked. The 'Description' field is empty. Below this, the 'Error Condition Formula' section shows an example formula: 'Discount_Percent__c > 0.30' with a link to 'More Examples...'. It explains that an error is displayed if the formula is true. Below the explanation, there are buttons for 'Insert Field', 'Use Formula Assistant', and 'Insert Operator'. The formula field contains the text: 'NOT(CONTAINS(Email__c, "@student.edu"))'. On the right side of the formula field, there is a 'Functions' dropdown menu showing a list of functions: ABS, ACOS, ADDMONTHS, AND, ASCII, and ASIN. At the bottom of the functions list is a button labeled 'Insert Selected Function'.

Error Message

Example: Discount percent cannot exceed 30%

This message will appear when Error Condition formula is true

Error Message Email must be a valid student institutional email

This error message can either appear at the top of the page or below a specific field on the page

Error Location ☐ Top of Page ☒ Field Email 

Activity 2: Fees Must Be Paid Before Approval

Purpose:

Prevent Enrollment from being approved until fees are paid.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Validation Rules → New.
3. Rule Name: Fees_Must_Be_Paid_Before_Approval.
4. Error Condition Formula:

```
AND(  
    ISPICKVAL(Enrollment__Status__c, "Approved"),  
    Fees_Paid__c = FALSE  
)
```

5. Error Message: Fees must be paid before approving an enrollment.

6. Error Location: Top of Page (or field as needed).

Click Save.

Milestone 6 – Approval Process

Activity 1: Create Approval Process for Enrollment Requests

Purpose:

Route Enrollment requests to Training Manager for approval or rejection.

Steps:

1. Go to Setup → Approval Processes → select Enrollment__c.
2. Click Create New Approval Process → Use Standard Setup.
3. Process Name: Approval_Enrollment_Request.
4. Entry Criteria: Enrollment_Status__c = "Requested".
5. Save and configure steps.

The screenshot shows the Salesforce Setup interface. The left sidebar contains navigation links: Setup, Home, and Object Manager. The main content area is titled "Approval Processes" under the "SETUP" section. A search bar at the top left contains the text "appr". Below the search bar, there are links for "Data", "Feature Settings", and "Process Automation". The "Approval Processes" link is highlighted. A dropdown menu for "Create New Approval Process" is open, showing options: "Use Jump Start Wizard" and "Use Standard Setup Wizard". The "Active Approval Processes" section is visible, showing a list of processes for "Enrollment". A yellow banner at the top of the main content area contains a list of steps: 1. View the lifecycle, 2. Create a custom user hierarchical relationship field, 3. Create email templates, 4. Create an approval process using either the Jump Start or Standard Wizard, 5. Add Approval History Related List to all page layouts, 6. Activate the process to deploy to your users.

Step 1. Enter Name and Description

Enter a name and description for your new approval process.

Enter Name and Description

Process Name	Approval_Enrollment_Request
Unique Name	Approval_Enrollment_Request i
Description	Approval process for Enrollment requests -- sends to Training manager

Step 2. Specify Entry Criteria

Step 2 of 6

PreviousNextCancel

If only certain types of records should enter this approval process, enter that criteria below. For example, only expense reports from employees at headquarters should use this approval process.

Specify Entry Criteria

Use this approval process if the following criteria are met :

Field	Operator	Value	
Enrollment: Enrollment Name	--None--	Requested	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		

6. Add Approval Step:

7. Approver: specific Training Manager user.

13. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:

Go to Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.

4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

The screenshot shows a web-based configuration interface. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. Below this is a search bar containing 'Tab'. A left sidebar lists various settings categories: Feature Settings, Analytics, Tableau (with sub-items like Tableau Embedding, Tableau UAF Claims Definition, and the selected 'Tabs'), User Interface, and Console Settings (with sub-items like Loaded Console Tab Limit, Rename Tabs and Labels, and the selected 'Tabs'). The main content area is titled 'New Custom Object Tab' and includes a 'Required Info' indicator. It contains fields for 'Object' (set to 'Student'), 'Tab Style' (set to 'Airplane'), an optional 'Splash Page Custom Link' (set to '--None--'), and a 'Description' text area. A 'Next' button is at the bottom right.

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned in Activity -1

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box.
Click New Lightning App.

Provide the app details:

App Name: Student Enrollment & Course Management

Developer Name auto-fills

Description: Optional, but can describe the purpose of the app

Click Next and choose the following settings:

App Branding (optional): Add logo or select color theme

Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer, Instructor**).

Click Next to select the items (tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings.

Finally, click Save & Finish.

Activity 1: Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.

2. Click Record Types → New.

3. For the first record type:

- Existing Record Type: Master
- Record Type Label: New Enrollment
- Enable for required profiles (Admin, Enrollment Officer).
- Select the default Page Layout → Save & New.

4. For the second record type:

- Record Type Label: Re-Enrollment
- Enable for same profiles.
- Select the default Page Layout → Save.

Activity 2: Separate Page Layouts Createuts for Each Enrollment Record Type

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

1. Enrollment__c object → click Page Layouts.
2. Click New to create a layout for New Enrollment:
 - Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
 - Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
 - Remove unnecessary re-enrollment fields if any.
 - Click Save.

The screenshot shows the Salesforce Page Layout Editor for the Enrollment__c object. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (selected), Lightning Record Pages, Buttons, Links, and Actions, and Compact Layouts. The main area is titled 'Create New Page Layout'. It features a yellow information box stating: 'As an option, you may select an existing layout to clone. If you create a page layout for international users.' Below this, there are two input fields: 'Existing Page Layout' with a dropdown menu showing 'Enrollment Layout', and 'Page Layout Name' with a text box containing 'New Enrollment Layout'. At the bottom right of the main area are 'Save' and 'Cancel' buttons.

Below the first screenshot, there is another screenshot of the 'Enrollment' object page in the 'SETUP > OBJECT MANAGER' section. The left sidebar is the same as the first screenshot. The main area shows the 'Page Layouts' section. It includes a toolbar with buttons: Save, Quick Save, Preview As..., Cancel, Undo, Redo, and Layout Properties. Below the toolbar is a 'Fields' section with a list of fields: Buttons, Quick Actions, Mobile & Lightning Actions, Expanded Lookups, Related Lists, and Report Charts. To the right of the 'Fields' section is a 'Quick Find' search bar and a table of fields. The table has three columns: Field Name, Last Modified By, and Owner. The fields listed are: Enrollment Name, Enrollment status, Fees Paid, Status, Course, Instructor, and Enrollment status. The 'Enrollment Name' field is highlighted in blue. Below the table is an 'Information' section with a header 'Information (Header visible on edit only)'. It contains a list of fields with their corresponding values: Enrollment Name (Sample Text), Student (Sample Text), Fees Paid (checked), Status (Sample Text), Course (Sample Text), Instructor (Sample Text), and Enrollment status (Sample Text).

3. Again, click New to create Re-Enrollment Layout:

- Clone existing layout → name it Re-Enrollment Layout → Save.
- Include fields like previous Enrollment reference (if any), Re-Enrollment Reason, Status, Fees, etc.
- Click Save.

4. Click Page Layout Assignment → Edit Assignment.

5. For each profile and record type:

- New Enrollment → use New Enrollment Layout.

6. Re-Enrollment → use Re-Enrollment Layout.

Click Save.

Activity 3: Enrollment Related Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student → Enrollment Related List

Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout.

In the palette, select Related Lists.

Drag Enrollments related list onto the layout.

Customize columns if needed → Save.

b) Course → Enrollment Related List

Go to Object Manager → Course__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor → Enrollment Related List

Go to Object Manager → Instructor__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:

Set Enrollment__Date__c to today when Enrollment is created.

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
- ☐ A record is updated
- ☐ A record is created or updated
- ☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. conserve your org's resources.

Condition Requirements

None

6. Add Update Records element:
 - Label: Set Enrollment Date.
 - Use record that triggered the flow.
 - Field: Enrollment_Date__c → Value: \$Flow.CurrentDate.

7. Save as SetEnrollmentDate → Activate.

Activity 2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.

Steps (high level for document):

1. Create Email Template and Email Alert for student notification.

2. Go to Flows → New → Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start ×

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

9. Save as Enrollment Approved Action → Activate.

Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical → Instructor C

Steps:

1. Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).
2. Create Record-Triggered Flow on Enrollment__c (created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor__c = Get_Instructor_X.Id.
9. Save as AutoAssign_Instructor → Activate.

Activity 4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

1. Create Record-Triggered Flow on Enrollment__c.
2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

 Configure Start ×

* Object

Configure Trigger

Trigger the Flow When:

☐ A record is created

10. Save as Create_Followup_Task → Activate.

Milestone 11 – Reports:

Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **New Report**.
2. Report Type: **Students**.
3. Group rows by **Status__c**.
4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

Activity 2: Create “Enrollments by Course” Report

1. New Report → Report Type: **Enrollments**.
2. Grouprows by **Course__r.Name**.
3. Show Record Count per course.
4. Save as **Enrollments by Course**

Activity 3: Create “Pending Enrollment Approvals” Report

- 1.New Report → **Enrollments** report type.
- 2.Filter: **Enrollment_Status__c = "Requested"**.
- 3.Add columns (Student, Course, Owner, Created Date).
- 4.Save as **Pending Enrollment Approvals**.

Report: Enrollments

Subtotal					
Total (2)					

Row Counts: ☐ Detail Rows: ☒ Subtotals: ☒ Grand Total: ☒

Activity 4: Create “Revenue Report (Fees Paid)” Report

- 1.New Report → **Enrollments** report type.
- 2.Filter: **Fees_Paid__c = TRUE**.
- 3.Group by **Course__r.Name**.
- 4.Summarize **Course_Fee__c** or similar fee field.
- 5.Save as **Revenue Report – Fees Paid**.

Milestone 12 – Dashboards:

Activity 1: Create “Student Managemet Dnashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder → **Create**.
4. Select new Dashboard folder and Save.

Add components:

- **Donut Chart** → using **Students by Status** report.
- **Bar Chart** → using **Enrollments by Course** report.

- **Gauge** → using **Revenue Report – Fees Paid** (sum of revenue field).
- **Table** → using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

):

1. Go to **Setup** → **Profiles** → **New** (or Clone Profiles)

Required:

- **Admin** – Full access.
- **Enrollment Officer** – Create/Update Enrollments.
- **Instructor** – Read-only access to assigned Enrollments.

2.Steps (example for Enrollment Officer fName:
Enrollment Officer.

3.In Object Settings:

- Enrollment__c: Read, Create, Edit.
- Student__c / Course__c: Read (and Edit if required).

4.Save.

Repeat similarly for Instructor profile with Read-Only on Enrollments

Activity 2: Create Permission Sets

- 1.Go to Setup → Permission Sets → New.
- 2.Create Custom Object Access (additional access to project objects if needed).
- 3.Create Dashboard Editor (Create/Customize Reports & Dashboards permissions).
- 4.Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

- 1.Go to Setup → Sharing Settings.
- 2.Set Organization-Wide Defaults:

- **Students (Student__c):** Public Read/Write.
- **Courses (Course__c):** Public Read/Write.
- **Enrollments (Enrollment__c):** Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).
- Use a simple **Record-Triggered Flow** to set **OwnerId = Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights

- Mobile access support

11. APPENDIX

- Source Code: Salesforce Configuration
- Dataset: Salesforce Objects
- GitHub / Demo: Salesforce Developer Org

Thank You
